

Professional Learning Modules

Safe@School Professional Learning Modules are designed for teachers and other members of the school staff. These modules have been designed to provide education workers with resources and proven strategies to assist them in handling the overall issue of bullying, homophobia, racism and sexism in schools, and the specific incidents that schools must deal with daily.

As its foundation, the modules use COPA's approach to prevention education and current research on, and best practices for, promoting a school environment in which all students can be *safe, strong and free*.
